the HURLEY DAVIT

FOR THE BOAT OWNER WHO DEMANDS THE BEST!

✧ Hurleys 3rd Option ✧

The H3O is specifically designed to allow the safe retrieval and stowage of a Rib Dinghy, Hard Hulled Tender or Jet Ski using this linear bunk system. The stainless steel mounting system provides a quick release, leaving a very small footprint and a clear deck for any activity. Requires only four bolts for the install and only stands 5/8" high leaving a clear deck for any activity.

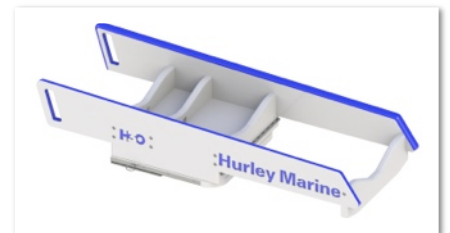

Another special feature of the H3O is the adjustable and removable winching system. The stainless steel retrieval arm is adjustable from 3' to 6', depending upon the length of your tender, and is easily removed for storage while underway.
