

**Hurley Marine™**  
INNOVATIVE MARINE PRODUCTS

NOTE: When swapping H2O 6", 8" or 10" davit to H2O 36" davit the customer will need to cut off .75" of the H2O cradle's foot. This is measured from the bottom of the H2O foot as in the image above. This is due to the added height of the H2O 36" mount which sits between the H2O cradle and button mount plates.
